Standard errors clustered by respondent.

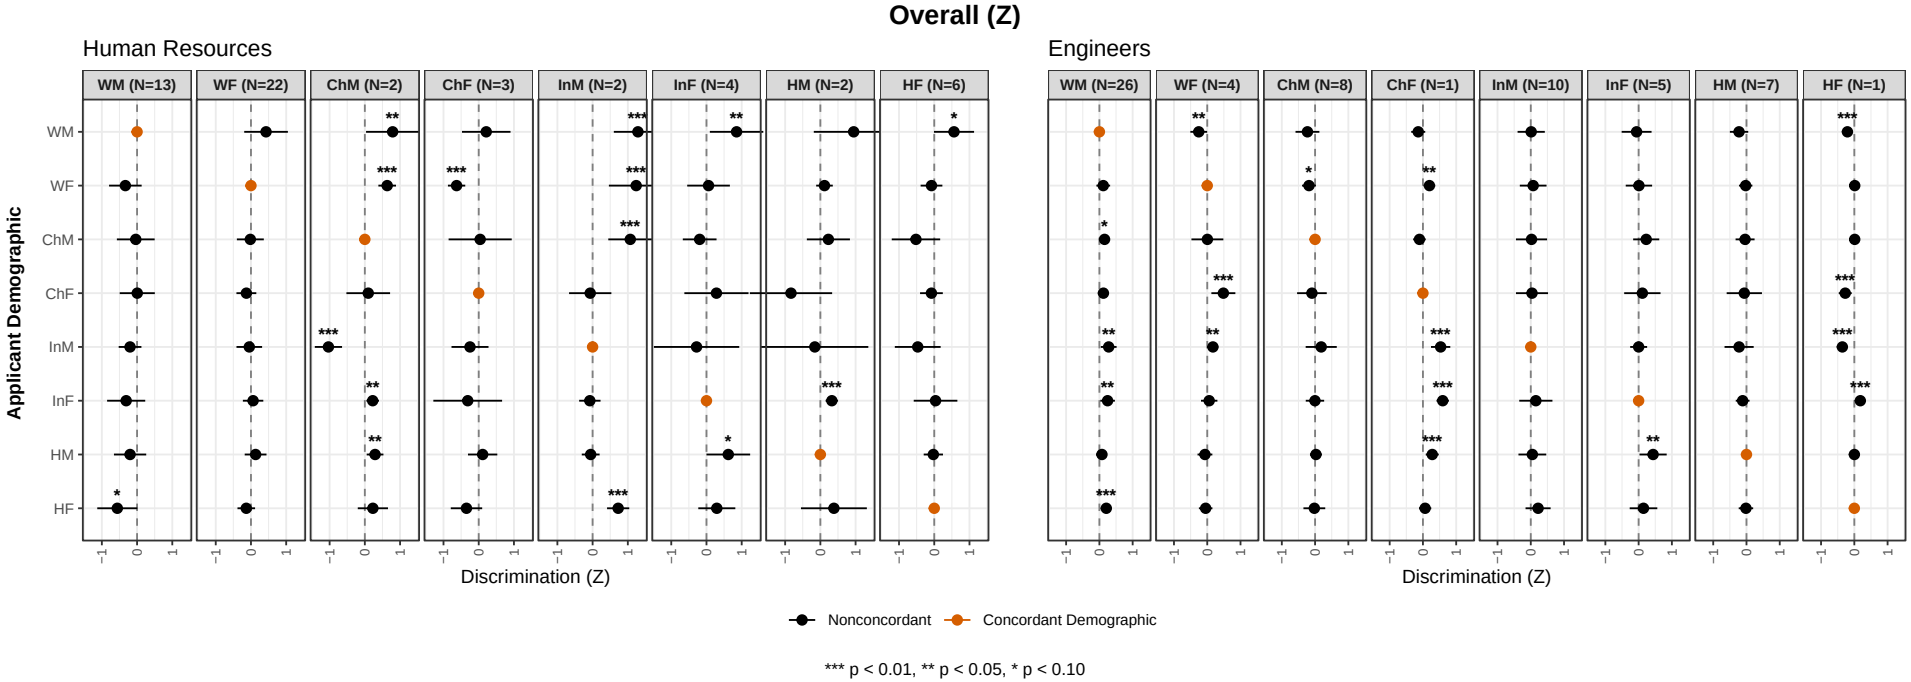
1.1.3.1 Who drives Engineers' Bias Against Concordant Race Gender Groups

Below graph centers the concordant group.



1.2 By DEI

The DEI Index is constructed as the row-wise mean of z-scored responses to four survey items capturing views on race-based DEI (`s5_view_dei_race`), gender-based DEI (`s5_view_dei_gender`), workplace diversity (`s5_view_diverse`), and DEI in hiring (`s5_view_hiring_dei`), and is then re-standardized within role × treatment cells.

	Panel A: HR				**Panel B: Engineer**			
	DEI Index		Single Item		DEI Index		Single Item
