

Figure 1 is a line graph showing the relationship between the HR Evaluator's Individual DEI Index (Z) and the DEI Index of the HR Evaluator's Direct Report. The x-axis represents the HR Evaluator's Individual DEI Index (Z), ranging from -2 to 2. The y-axis represents the DEI Index. Two lines are plotted: a solid blue line and a dashed red line. The solid blue line shows a slight negative relationship, while the dashed red line shows a slight positive relationship. Shaded areas around the lines represent confidence intervals. The text "Blinding helps" is placed above the solid blue line, and "Blinding hurts" is placed below the dashed red line.

Figure 1 is a line graph showing the relationship between the HR Evaluator's Individual DEI Index (Z) and the HR Evaluator's DEI Index (Z). The x-axis ranges from -2 to 2, and the y-axis ranges from 0 to 1. A solid blue line represents the relationship, which is positive and linear. A dashed red line represents the relationship, which is negative and linear. Shaded areas around the lines represent confidence intervals. The text "Blinding helps" is in green above the blue line, and "Blinding hurts" is in red below the red line.
